## PROFILE

Hello, I'm a versatile individual with a range of skills. I excel in coding and design, focusing on creating user-friendly digital solutions with a strong design sense. My leadership and communication skills enable smooth collaboration with teams, leading to successful project results. I'm always eager to learn and grow both personally and professionally.

## SKILLS

**Programming Languages**
- Java
- JavaScript
- React JS
- Python
- SQL

**Technologies**
- Web Development
- React JS
- App Development
- Database Management
- UNITY 3D

## PROJECT EXPERIENCE

**SMART INDIA HACKATHON WINNER - A GAMIFIED FITNESS APP USING UNITY**

December -2023

- Got selected for Internal Smart India Hackathon
- Won the Grand Finale of the Smart India Hackathon in the problem statement Student Innovation (Fitness & Sports)
- We crafted a Gamified fitness app for kids (ages 5-12), incorporating real-time body tracking. In the prototype, children engage in squats within a Flappy Bird game, selecting favorite characters as personal fitness assistants for motivation and interaction

**DISEASE PREDICTION AND PREVENTION USING MACHINE LEARNING ALGORITHMS**

April -2024

- This project uses machine learning algorithms to predict the disease and suggests a temporary preventive measure to treat the disease until the reach of hospital
- This collects the symptoms the user poses and match it with pre - existing data base to find the accurate disease and preventive measure for it .

**PERSONAL PORTFOLIO**

May -2024

- A portfolio allows you to demonstrate your technical skills and expertise. It provides concrete examples of your work, showcasing your ability to solve problems, write clean code, and build functional applications.
- So i made a personal portfolio myself using react js .
